

# My Blueprint for Accomplishing \_\_\_\_\_

## Setting Big Goals

Your goals blueprint explains how to reach your goal from point A to point B. By using this tool, you will be able you to see your strategy in one place. It's good to be able to see the big picture and to break the goal down into smaller measurable and doable goals. A blueprint helps you to see where you are going and how to get there. Label 4 smaller goals that lead to your big goal and write a strategy for reaching them.
